CITY OF MERIDEN
142 East Main St.
Meriden, CT 06450-5605

CITY OF MERIDEN, CONNECTICUT - The City of Meriden has completed the Semi-Final Design plans for the next phase of the Harbor Brook Flood Control and Linear Trail project, for reconstruction of the river channel between Coe Avenue and Cooper Street, and replacement of the Leslie Drive Sewer Bridge.

This phase begins at the Coe Avenue Bridge over Harbor Brook and follows the course of the brook to the Cooper Street Bridge. It will include widening and deepening of the brook channel, creation of benched areas along the brook to increase flood water storage, and replacement of a bridge carrying the sanitary sewer main over Harbor Brook south of Leslie Drive. A multi-use trail is also planned for along the brook between Hanover Street and Cooper Street.

It is the City's desire to keep persons informed and involved when such projects are undertaken. It is important that the community share its concerns with us to assist in the project's development. There will be a public presentation on Thursday, February 23, 2017 at City Hall at 6:30 pm in the Council Chamber. The purpose of this presentation is to familiarize the public with the plans and address any issues and concerns that may arise.

Based upon a preliminary assessment, the construction cost will be approximately $6,500,000.

Anyone interested in obtaining further information may do so by contacting Brian Ennis, P.E., Associate City Engineer, at 203-630-4019. Deaf and hearing impaired persons wishing to attend this meeting and requiring an interpreter may make arrangements by contacting the office at least five working days prior to the meeting.
